***Claims Rejected***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The phrase "sequentially from an end toward another end, in an alignment graph for indicating rotation speeds of rotational elements by straight lines," appears to indicate that applicant is depending upon a graph in the figures for patentable subject matter. This is improper because:

"Where possible, claims are to be complete in themselves. Incorporation by reference to a specific figure or table "is permitted only in exceptional circumstances where there is no practical way to define the invention in words and where it is more concise to incorporate by reference than duplicating a drawing or table into the claim. Incorporation by reference is a necessity doctrine, not for applicant's convenience." *Ex parte Fressola*, 27 USPQ2d 1608, 1609 (Bd. Pat. App. & Inter. 1993) (citations omitted)"

See MPEP 2173.05(s).

***Allowable Subject Matter***

Claims 1-7 contain allowable subject matter and would be allowable if the rejection under 35 USC 112, second paragraph, were overcome.

The subject matter is allowable because the prior art does not anticipate nor render obvious the invention of an automatic transmission that includes a pair of planetary gear sets with a carrier of a first set integrally coupled to a carrier of the second set, and including at least 3 brakes and 2 clutches wherein the engagement of first through fourth speed ratios requires the

Art Unit: 3681

engagement of a first clutch plus one other frictional engagement device, and a fifth gear is established by the engagement of a second clutch and a third brake.

***Prior Art Discussed***

The examiner has considered the references cited by applicant in his Information Disclosure Statement filed July 17, 2003. None of the references cited show all of the features of the claimed invention.

The reference cited by the examiner is deemed pertinent to applicant's disclosure but also does not show all of the features of the claimed invention. The arrangement of the clutches and brakes in the transmission of Haka is different than the claimed invention.
